REFUSE DISPOSAL SERVICE SPECIFICATIONS
FOR
CONTRACT N62476-68-B-1717

1. PREMISES TO BE SERVED:

Puget Sound Naval Shipyard is the source of refuse.

2. ESTIMATED SERVICE REQUIREMENTS:

a. The estimated volume of the refuse material is as follows:

Daily average	370 cubic yards
Maximum daily peak	700 cubic yards
Annual volume	93,000 cubic yards

b. The monthly volume classification of refuse to be handled is estimated to be as follows:

Industrial trash	6,000 cubic yards
Contaminated garbage	50* " "
Timber and logs	1,000 " "
Oils, tar and chemicals	50 " "
Sawdust	650 " "

Hog swill and domestic type garbage is ⁷⁷⁰⁰ handled by others under separate contracts.

c. The Government is in no way obligated to use nor is it restricted to the above estimated service requirements.

3. TERM OF CONTRACT:

The Contractor shall provide refuse disposal service commencing 1 July 1968, and ending 30 June 1969.

4. DESCRIPTION OF REFUSE DISPOSAL SERVICE: The service shall consist of the disposal of all refuse by the Contractor after it has been delivered by the Government onto the Contractor's refuse disposal site.

*Occasionally, small amounts of contaminated garbage (i.e., not suitable for hog swill) will be included in the refuse. In general this will consist of bones, fruit rinds, egg shells and coffee grounds.
